

Tokyo University of Science Laboratory of Neuroscience Nobuyuki Munemura

Learning about Nodes and Edges,
I make systems that connect
with each parts of brains, genes, functions and constructions.

Used to write with C and C++ language,
I hope to glue them with python code.

In this time,
I 'll acquire ideas of scientific algorithm,
and utilize them for new discoveries.

Purpose: Neural Gene Ontology(NGO) development

Tool: Visual Studio (Express and Code)

OS: Linux(Ubuntu), Windows 10
