

Brainhack Global 2017 Japan

March 2-4, 2017 at RIKEN

brainhack.org

Brainhack (<http://brainhack.org/>) is a unique conference that cooperates with researchers around the world on brain and neuroscience projects to promote information sharing and joint development. **Brainhack Global 2017** is a huge event held at the same time in 40 regions in 17 countries around the world from March 2nd to 5th. In Japan this event will be held at the RIKEN Brain Science Institute for 3 days (March 2-4, including Hinamatsuri festival) during this period.

Brainhack Global 2017 Japan is an event where researchers have an opportunity to collaborate on projects and related developments, share knowledge and engage in cooperative planning. The central theme for this event is thus cooperation and joint development with a goal towards promoting compatibility between existing systems and the creation of common formats. We hope this event will spur the development of common APIs and services such as Web-based information visualization and image processing systems. During this period you may share information using the dedicated channel **#bhg17-japan** in the Brainhack Slack Site (<https://brainhack.slack.com/>).

We call for participation from young researchers, students and engineers who are currently involved in brain sciences as well as those who are interested in this field.

- Date: March 2-4, 2017
- Venue: RIKEN BSI (Wako Saitama, Japan)
 - Access: <http://www.riken.jp/en/access/wako-map/>
- Organized by: Brainhack Global 2017 Japan Committee
 - Contact: office@nijc.brain.riken.jp
- Number of participants: 20 at most
- Deadline of registration submission: **February 16th(Thu), 2017**
